*All Power is within You
You can do Everything ... Believe in Yourself*

India is now officially the world's fastest growing economy. Economic growth is incomplete and unsustainable if it is not rooted in a strong, world-class educational infrastructure. Education is the most important lever for social, economic and political transformation. Accordingly, recognizing the importance of education in national development, the Twelfth Five Year Plan places an unprecedented focus on the expansion of education, on significantly improving the quality of education and on ensuring that educational opportunities are available to all segments of the society. To meet these challenges, the Ministry's endeavour has been to achieve 'Education for All' with an inclusive approach. As educational development is a stepping-stone to economic and social development, and is the most effective instrument for empowering the Tribals.

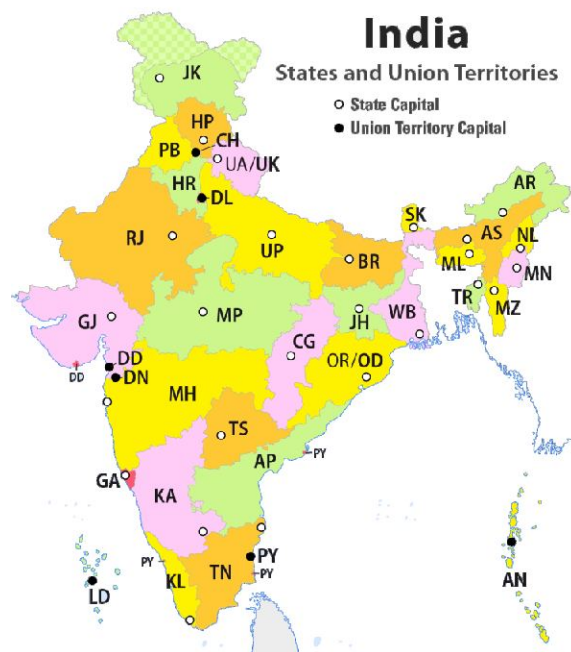

Tribal population of our country, as per 2011 census, is 10.43 crore, constituting 8.6% of the total population. Broadly the STs inhabit two distinct geographical areas the Central India and the North-Eastern Area. Among States Mizoram (94.43) has highest proportion of STs and Uttar Pradesh the lowest (0.57). Among UTs, Lakshadweep with 94.8 percent of ST Population ranks first and Daman & Diu has the lowest proportion of STs (6.32). With respect to districts, Kurung Kumey district of Arunachal Pradesh has the highest proportion of Scheduled Tribes (98.58) and Kannauj in Uttar Pradesh has the lowest proportion of Scheduled Tribes (0.0009)

Higher education is critical for developing a modern economy, a just society and a vibrant polity. It equips young people with skills relevant for the labour market and the opportunity for social mobility. It provides people already in employment with skills to negotiate rapidly evolving career requirements. It prepares all students to be responsible citizens who value a democratic and pluralistic society. Indeed, higher education is the principal site at which our national goals, developmental priorities and civic values can be examined and refined.

With a view to encourage skill development, due focus is being given on 'Vocational Education' so as to enhance individual employability and entrepreneurship, reduce the mismatch between demand and supply of skilled manpower and provides an alternative for those pursuing higher education.

SN	States & UTs	Percentage	SN	States & UTs	Percentage
1	Andhra Pradesh	7.00	18	Meghalaya	86.10
2	Arunachal Pradesh	68.80	19	Mizoram	94.40
3	Assam	12.40	20	Nagaland	86.50
4	Bihar	0.92	21	Odisha	22.80

- **Understanding the learner**
- **Teacher as a Counsellor**
- **ICT In Teaching and learning**
- **Development of Life Management Skills**
- **Field Visit - Let us Build Nation**

EDUCATION AND YOUTH

Education forms an important component in the overall development of individuals, enabling them to greater awareness, better comprehension of their social, political and cultural environment and also facilitating in the improvement of their socio-economic conditions. Therefore education is the most effective instrument for empowering the Tribal Youth. Though India's education system over the past few decades has made significant progress, largest proportion of centrally sponsored programmes for tribal development are related to the single sector of education. Also, Tribal People in India have immeasurable experience and extensive traditional knowledge on many aspects including arts, medicine, dance, paintings, nature and on sustainable resource management. Best opportunities should be created to accelerate their skills and capacities for the overall growth and development of the nation. Globalisation and market forces are creating employment opportunities across countries on a large scale never seen before. As India moves progressively towards becoming a 'Knowledge Economy', there is a need of the hour to focus on development of skills in relevance with the emerging economic environment. Realising the fact, Union Planning Commission of India stated that **"India would not be able to achieve 9% economic growth without imparting skill training to its youth"**. Also amongst others, the most prominent of all the change agents is the target set by Hon'ble Prime Minister to impart **skill training to 400 million people by the year 2022**.

Literacy Rate, 2011

	Total	Male	Female
Total Population	72.99%	80.89%	64.64%
